# Video Discussion and Family Firearms Intervention

Mark Ciocca, Ph.D.  
Capital Valley Counseling Associates, Inc.

# Family Intervention Video

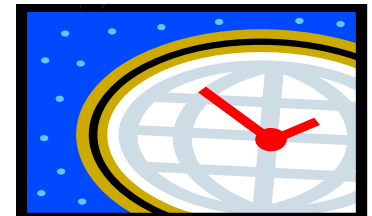

## *Key Principles:*

- Inform about situational risk
- Inquire about means availability
- Discuss need for reducing access

# Family Intervention Video

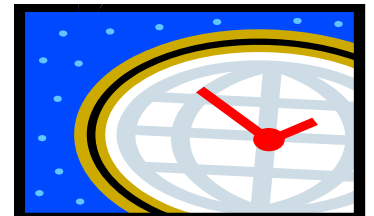

- Listen to everyone and engage them in problem-solving
- Discuss barriers to a means reduction plan
- Formulate a workable plan
- Delineate specific roles
- Obtain commitment to implementing the plan

# Home Firearms Assessment

## *Principles and Rationale*

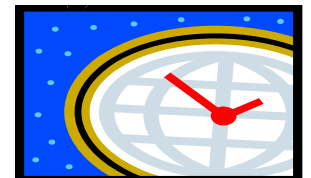

- Once there has been a threat or an attempt, probabilities have shifted.
- Firearms used in a youth suicide almost always come from the victim's home.

# Home Firearms Assessment

## *Principles and Rationale*

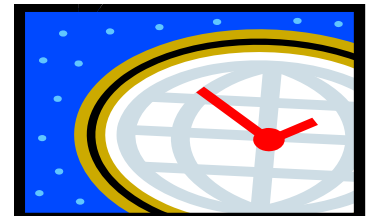

- Lockable storage and trigger locks are not effective for adolescents
- Training and familiarity with firearms can increase rather than decrease risk

# Home Firearms Assessment

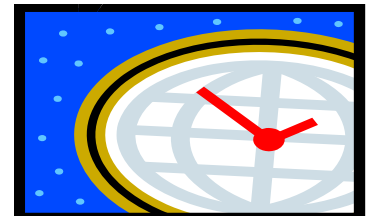

## *Principles and Rationale*

- When a gun is used, there is little chance for a good outcome.
- Accessibility, impulsivity, and emotionality are interactive and potentially dangerous.

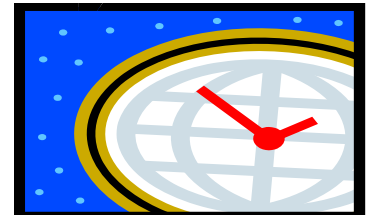

# Conducting a Home Firearms Assessment

- Involve all adults especially males.
- Assess for multiple households.
- How many firearms are in the home?

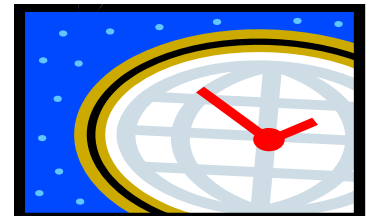

# Conducting a Home Firearms Assessment

- How are the firearms stored and secured?
- What type of safety measures are currently in place?
- Is ammunition accessible?

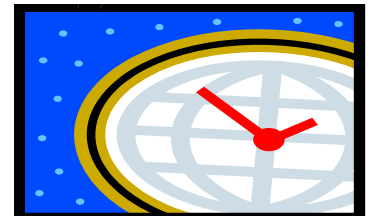

# Conducting a Home Firearms Assessment

- Who uses the gun(s) or has knowledge of their use?
- Is access to firearms a job requirement for someone in the home?

# Conducting a Home Firearms Assessment

- If firearms are kept loaded and accessible, why is that the case?
- What changes can be made to increase the safety of the situation?

# Conducting a Home Firearms Assessment

- Is there someone trusted to hold firearms if they are removed?
- What barriers or obstacles exist to their removal?
- Can a solution be found?
